

Extra Hints for Playing

SKEETER

(See Other Side for Rules)

To give everyone a fair chance to slap each of the four SKEETERS when turned, remember these special rules:

1. Make sure the slapping pile is exactly in the middle of all the players.
2. When you play a card, keep it face down until you turn it, so no one gets first peek at it. Turn it away from yourself.
3. When you turn a SKEETER, use the same hand to slap it.
4. If several slap at once, the bottom hand, directly on the SKEETER takes the pile.
5. When a player takes the middle pile, he should mix the cards before placing them under his own stack. Otherwise, the players may remember the order of the cards.
6. If a player slaps a card that isn't a SKEETER, he gives his top card to the player of the card he slapped by mistake.
