# FUNNIES

*The Game of 4,000 Laughs!*

With this game you can teach children the fundamentals of cartoon composition; you can entertain large parties by offering prizes for the funniest face created with these cartoon pieces; you can give invalids and convalescents the chance to take their mind off their ills and get some laughs by whiling away an hour or two with FUNNIES; or you can amuse yourself whenever the spirit moves you.

---

## INSTRUCTIONS

---

In this box are forty-eight cartoon pieces; twelve face profiles, twelve head tops, twelve head backs, and twelve necks. Any four of these combinations will make one complete cartoon, providing you use a profile, top, back, and neck for each. Obviously four faces won't do, and neither would two faces plus two necks. You must use a profile, top, back, and neck each in its proper place.

Part of the fun of playing this game is determining which is which; and the surprising and unlooked for results you obtain will prove as interesting as fitting together a jig-saw puzzle, with many a hearty laugh thrown in for good measure.

From time to time FROMMES INDUSTRIES will issue new editions of these FUNNIES. Save your old ones and eventually you will have a FUNNIES library good for an almost limitless number of laughs.
