

DIRECTIONS
for playing the game of
FIVE HUNDRED

From 2 to 4 players can play this game.

Players play on both sides of game board. Each player selects his colored track and man of same color. Game starts with first player shooting the marble. If marble rolls into a hole marked 5 or 10, etc. he inserts his man on his colored track above number 5 or 10. Next player plays. Next round player again shoots the marble and if marble rolls into 5 or 10, he jumps on his track to 10 or 15, etc. For example if player hits 5 the first time and hits 5 on his second play his score so far is 10 and his man should be inserted in 10, or if he hits 10 the first play and 5 on the second play his score is 15 and his man should be inserted in 15. When player reaches 100 on game board, he marks down 100 and starts again at the beginning. First player who scores 500 is the winner. New game follows.
