

THE SPINNING EGG GAME
Parker Brothers (inc.)
Salem , Mass.
New York & London

Directions for playing the Spinning Egg Game

First- Wind the string tightly on the spindle.

Then place the egg on the disc and hold the handle firmly (after inserting it into the egg as shown in the illustration) Hopefully "copiers word" but DO NOT PRESS DOWN.

Then pull the string steadily with increasing force, and immediately lift the handle. The egg while spinning will gradually rise on end, and then lie down again. Always use the disc, as the egg is not liable to stay in one place when spinning on a flat surface.

CAN YOU TELL WHICH END WILL COME UP?

if the light end rises it counts 5.

if the dark end rises it counts 10.

The end that rises is the indicator, and when the egg stops spinning, you will know what you have won or lost according to the spaces on the dial where this end points. The game can be one hundred points or more.

Any number of persons can play this game.

A short description ;

The egg is about the size of an egg.

The apparatus for spinning is large lollipop looking thing about 4 inches.

Where the egg spins is like pie tin upside down pushed in so the egg remains in "bounds". About 7 inches across.

Around this are point areas (12) to be exact, varying from +5 to - 2 also PLAY AGAIN spot.

Egg is spun like a top , Egg is red white & blue. Spinning force propels top therefore raising on end. "physics stuff" I Guess. OH! Lollipop thing is inserted into center part of  , string is pulled , let the GAME BEGIN.
