SHEPHERD'S
National Game of Finance.

DIRECTIONS.

This pack consists of thirty-six cards. The dealer shuffles the cards and deals them out, one at a time, until each player has four cards; the remainder of the pack is deposited, face down, in the center of the table, and is called "The Dummy." Each subject on the National Finance is represented in four cards that constitute a "Book," the title of which is prominently given at the top of each card. Upon each card there are three questions regarding National Finance, an answer to each appearing at the top of each of the other cards composing the "Set" or "Book." The player on the left of dealer begins the game by calling upon any other player to answer either one of the three questions that he may ask for, under the title of the "Book," a portion of which he holds. If he obtains the card with proper answer from the player called, he may ask questions of any other one of the players, or continue asking until he fails to get an answer, and then is entitled to a second chance by drawing the top card from the Dummy; if successful, he may still continue to the next player on the left.

When all the cards are gathered into Books the game ends, and the player having the largest number of Books wins.

The figures given in this educational game are compiled from the latest reports from the Bureau of Statistics of the Treasury Department and Director of the Mint.
