

DIRECTIONS.

Place the cards flat on the table, then select such features as may be desired, and place them in the holes made to receive them. The eyes can be placed up side down, or from right to left; this will cause very queer expressions.

It is not necessary in making up a portrait to use the features that properly belong to it, as any may be selected to suit the fancy.

PATENT APPLIED FOR.

J. H. SINGER, New York.
