

# SNAP

Deal the cards equally. Each player must place them face down in front of him.

The game commences by the player at left of dealer laying upon the table before him the top card held in his hand, at the same time turning it **FACE UP**. The play goes around to the left, each player in turn turning the top card in his hand **FACE UP** on the table. At any time when any player shall see two cards which are alike turned upon the table, he or she must call out "SNAP," and the one first calling, takes all the cards in both places where the duplicate cards appear. The fortunate player takes all cards won and places them under his own cards in his hand, and must then play his top card upon the table, and the game goes on as above described until one player wins the entire pack.
