

ROLLER DICE RULES

INTRODUCTION

Roller Dice is an exciting game of skill and chance that's great fun for the whole family. Throw the soft, foam dice toward the target ring and add up the points of the dice that land within the ring. The first player or team to reach the predetermined point total is the winner.

SET UP

Place the target rings on a level surface 15 to 25 feet apart depending on the skill of the players. (Younger players may require shorter throwing distances.) A predetermined winning point must be selected—15 or 21 points.

PLAYING THE GAME

Play head-to-head or in teams. Order of play is determined by a throw of one die per player or team. The highest die goes first.

Players must stand behind the throwing ring and throw or roll the dice in an attempt to land the dice within the target ring. *Only dice that land within the scoring ring will count for points.*

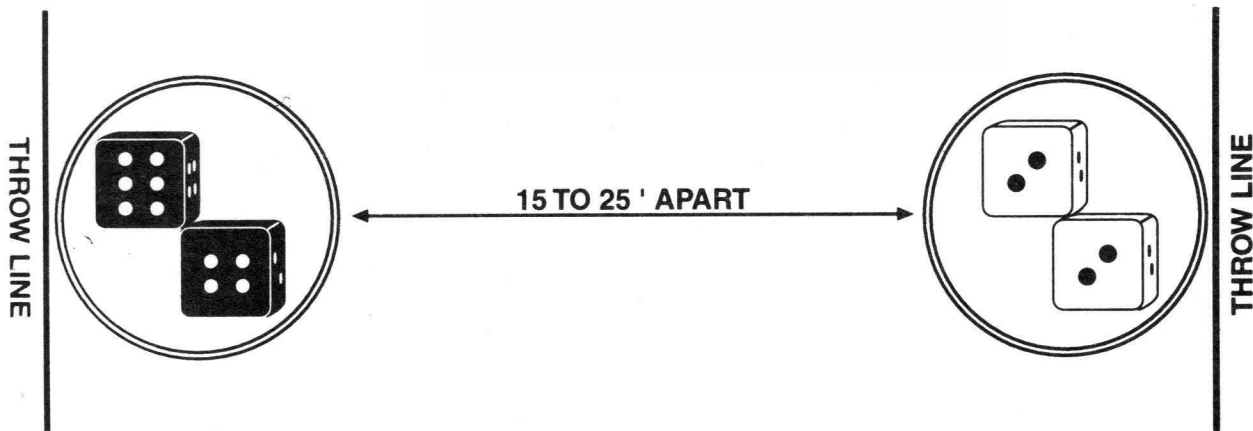

* Play alternates between players or teams until all four dice have been thrown and the round is finished.

At the end of the round each team adds up the points of the dice which landed within the scoring ring. Play then resumes in the opposite direction with the player or team with the highest score in the previous round going first.

WINNING THE GAME

The first player or team to reach the predetermined point total is the winner.

*For more challenging play: count points only for the player or team with the highest point total within the target ring.
