

ABCA Archives. Donated 3/98
by David Galt

ALLOWED. You must always keep all your plays inside the cross.

LONE PEG will require a good deal of patient effort on your part. Don't give up easily. Oh yes! it can be done. Here's the solution: Imagine the holes in the cross to be numbered like this:

		7	14	21		
		8	15	22		
1	4	9	16	23	28	31
2	5	10	17	24	29	32
3	6	11	18	25	30	33
		12	19	26		
		13	20	27		

Start by jumping peg in hole 29 to hole 17 which is empty. Remove peg in hole 24 from the board. Then continue and always remove the peg you jump

over from the board.

22 to 24	16 to 4	27 to 13
31 to 23	7 to 9	26 to 12
33 to 31	10 to 8	6 to 18
16 to 28	1 to 9	13 to 11
31 to 23	3 to 1	18 to 6
24 to 22	6 to 4	9 to 11
4 to 16	8 to 10	6 to 18
7 to 9	1 to 9	17 to 19
21 to 7	18 to 6	30 to 18
22 to 8	13 to 11	19 to 17

PEG MOSAICS

There is still another amusing and interesting pastime offered by your PEG GAME. You can spend many agreeable hours making artistic MOSAIC designs. MOSAIC designs are almost the oldest artistic work known to mankind but you are going to make them in a most modern and interesting way. You can make

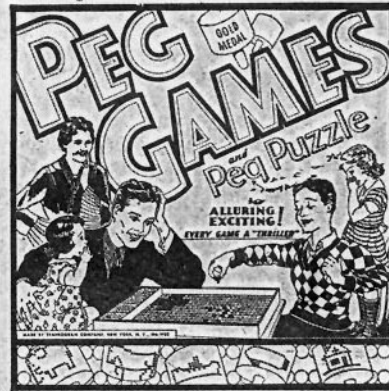

your designs by placing the different colored pegs into the holes on the PEG BOARD. You can invite your friends to work with you and all of you will have an exciting time making pictures of animals, flowers, birds, characters and an endless variety of colorful designs. A few suggested designs are illustrated on the sides of the cover of this box.

You will find PEG MOSAICS, LONE PEG, and PIG-PEG-PIC-PAC-POE pleasant diversions. You can come back to these games from time to time and always find them everlastingly fascinating.

This is a "GOLD MEDAL" Game
