

Three 1's, if together, a removal.

Three 8's, a settlement.

If in your thirteen cards the letters come like this, F, A, Z, E, you will be bothered about something; but if you should have E, A, Z, things are going to be easy for you. Three F cards when together in your fortune mean that you will be fortunate in affairs of the heart.

Three Z cards when together mean money for you.

Three A cards when together mean things to wear.

Three E cards denote trouble when together.

You read the cards three times for one fortune, shuffling, cutting the cards, and wishing the same wish each time.

If someone should tell your fortune, you must always shuffle and cut the cards for the reading.

## FORTUNE TELLING CARDS

### DIRECTIONS

Shuffle the cards well, wish, and cut twice, making three packs, face down. Look at the cards exposed by each cut, they are important in your fortune.

Now, beginning at the bottom card of the first cut, lay them in four rows, nine in a row.

Notice the Key card. This is the most important card in your fortune. Count backward 13 from the key card. Count from right to left. Do not count the Key card. This is the only time you count backward. This card belongs to your

fortune, no matter where it is located. This is the card that opens the door to your fortune.

Locate yourself by your complexion. The light and red-haired are printed in orange, with letters F and Z. The brown and dark-haired in black with letters A and E.

If a man, you will be No. 1 of F, A, Z, or E.

If a woman, No. 2 of F, A, Z, or E.

If you are of medium complexion you will be in A.

After locating yourself, count thirteen cards from yourself. Count from left to right. Do not count yourself.

②

If you should happen to be on the bottom row, continue the count on the top row until the 13th card is reached. Notice the 13th card. It is one of the most important cards.

Within these thirteen cards you will find your fortune.

### NOW READ

Commence with yourself and read all through the cards until you come to the 13th, making a connected story.

If you notice the relation of the cards to each other, you will obtain surprising results. If "wishes" is among your thirteen cards you will get your wish.

③

If among your thirteen cards, there are any cards you wish to understand better, count thirteen from these cards. Note the cards on each side of yourself, also on each side of the thirteenth.

On lottery questions 9F is the ticket, 6Z is the prize and 8E is the blank.

Three or four 1's standing around you, or together among your thirteen cards, denote friendship, or a new friend.

Three or four 2's denote words, especially if attended by passion. Three or four 3's denote knavery.

Three 4's is a sign of great surprise, if together.

④
