

STOP AND GO, A safety game.

(Whitman Publishing Co.
copyright 1939)

A game to teach road safety and obeying traffic lights.

The rules are printed inside the box lid and as the game is the entire box bottom the rules are unlikely to be asked for separately.

The game is unusual in that the board consists of a turning wheel beneath the pictorial board--this changes the traffic situations with every move.

2 wooden dice and 4 colored wooden pegs complete the game.
